Articles

References are given in the form of a volume number (in brackets) and a page number.

Accelerated fatigue testing method
A. Rotem **(3)** 211

Acceleration of FCP in toughened PMMA following a step increase in load amplitude
C. B. Bucknall and P. Dumpleton **(9)** 103

Analysis of thermal cycling by solid mensuration
H. Albaugh and R. Venuti **(2)** 118

Analytical fatigue evaluation of externally welded box girders
M. Abo-Hamd, M. El Haddad and H. Abdel Raouf **(10)** 193

Application of finite element analysis techniques for predicting crack propagation in lugs
O. Gencoz, U. G. Goranson and R. R. Merrill **(2)** 121

The application of a statistical fatigue life prediction method to agricultural equipment
B. B. Harral **(9)** 115

Applications of a study of service-strength to the construction of special-purpose machines
W. Schweer and R. Fangmeier **(2)** 177

Assessment of mechanical behaviour, microstructure and critical conditions of welded commercial purity titanium
R. L. Jones and T. V. Duggan **(3)** 89

Asymptotic stress intensity factors for fatigue crack-growth calculations
D. P. Rooke **(2)** 69

Automated estimation of fatigue crack length and closure/opening stress
K. K. Brahma, R. Sunder and B. Dattaguru **(9)** 51

Automatic near-threshold fatigue crack growth rate measurements at liquid helium temperature
R. L. Tobler and Y. W. Cheng **(7)** 191

Calculating the J-integral of different types of specimens in fracture studies by means of η factors
Li Xiao-wei and Liu Yi **(10)** 261

Closure of part-through fatigue cracks at the notch root
R. Sunder and K. Anandan **(9)** 217

Comparative thermal fatigue resistance of several oxide dispersion strengthened alloys
J. D. Whittenberger and P. T. Bizon **(3)** 173

Comparison of an engineering estimate with a numerical solution for the stress concentration factor of a hole near a circular edge notch
J. Schijve, W. E. Fraga and R. L. Hewitt **(8)** 111

Comparison of fatigue damage detection in carbon and glass fibre/epoxy composite materials by acoustic emission
J. Holt and P. J. Worthington **(3)** 31

Comparison of fatigue properties of nodular cast iron production and Y-block castings
F. D. Griswold, Jr and R. I. Stephens **(9)** 3

A comparison of the fatigue performance of woven and non-woven CFRP laminates in reversed axial loading
P. T. Curtis and B. B. Moore **(9)** 67

A comparison of the fatigue strength of machined and as-cast surfaces of SG iron
M. S. Starkey and P. E. Irving **(4)** 129

Comparison of the strength and damage tolerance of aluminium alloys
L. Schwarmann **(8)** 73

Comparison of static and dynamic fatigue crack growth rates in high-density polyethylene
P. Dumpleton and C. B. Bucknall **(9)** 151

Computer-based full scale fatigue testing
D. K. Ewing **(1)** 89

Computer control of a complex block-loading test
A. F. Dier and R. E. Hobbs **(8)** 151

Corrosion fatigue behaviour of brass in aqueous solution
V. K. Gouda, A. A. Ramadan and G. I. Youssef **(5)** 207

Corrosion fatigue of BS 4360: 50D structural steel in seawater
T. W. Thorpe, P. M. Scott, A. Rance and D. Silvester **(5)** 123

Crack closure and surface microcrack thresholds –

some experimental observations
M. N. James and G. C. Smith **(5)** 75
Crack closure – is it just a surface phenomenon?
N. A. Fleck and R. A. Smith **(4)** 157
Crack growth in aluminium alloy sheet material under flight-simulation loading
J. Schijve, A. M. Vlutters, Ichsan and J. C. Provó Kluit **(7)** 127
Crack growth in Ti-6Al-4V under the conjoint action of high and low fatigue
B. E. Powell and T. V. Duggan **(9)** 195
A criterion for omission of variable amplitude loading histories
P. Heuler and T. Seeger **(8)** 225
A cumulative damage theory for fatigue crack initiation and propagation
D. Kujawski and F. Ellyin **(6)** 83
A cumulative model of fatigue crack growth
G. Glinka **(4)** 59
A cumulative model of fatigue crack growth and the crack closure effect
G. Glinka, C. Robin, G. Plwinage and C. Chehimi **(6)** 37
Cycle counting for fatigue crack growth analysis
R. Sunder, S. A. Seetharam and T. A. Bhaskaran **(6)** 147
Cyclic and monotonic crack propagation in a high toughness aluminium alloy
D. Rhodes, J. C. Radon and L. E. Culver **(2)** 61
Cyclic fatigue crack growth tests on disc specimens
A. Storey **(9)** 131
Cyclic response and inelastic strain energy in low cycle fatigue
D. Lefebvre and F. Ellyin **(6)** 9
Cyclic strain hardening of polygonal and acicular ferrite/bainite microstructures in microalloyed steels in the temperature range −150°C to 27°C
J. P. Lucas and W. W. Gerberich **(7)** 31
Cyclic stress response and deformation behaviour of precipitation-hardened aluminium–lithium alloys
T. S. Srivatsan and E. J. Coyne, Jr **(8)** 201
Cyclic response of a 1 Cr-Mo-V low alloy steel
W. J. Plumbridge and R. A. Bartlett **(4)** 209
Developments in hardware and software for computer controlled servohydraulic fatigue testing systems
H. Nowack, D. Hanschmann, N. Baumhoff and G. Jacoby **(1)** 93
Determination of threshold stress intensities: fatigue of low-alloy steel BS 4360: 50D
J. C. Radon **(4)** 225
Durability analysis of machinery components
J. Kogan **(3)** 27
Dwell time effects on the fatigue behaviour of titanium alloys
Z. Song and D. W. Hoeppner **(10)** 211
The effect of compressive peak stress on fatigue behaviour
M. T. Yu, T. H. Topper, D. L. DuQuesnay and M. S. Levin **(8)** 9
Effect of cutting speed and tool rake angle on the fatigue life of 2024:T351 aluminium alloy
S. Jeelani and M. Musial **(6)** 169
Effect of electric discharge machining on the fatigue life of Inconel 718
S. Jeelani and M. R. Collins **(10)** 121
Effect of environment on the low cycle fatigue behaviour of cast nickel-base superalloy IN738LC
Guo Jianting, D. Ranucci, E. Picco and P. M. Strocchi **(6)** 95
The effect of frequency and environment on the fatigue-crack growth behaviour of ASTM A533 Grade B Class 1 weldment material
C. J. Poon and D. W. Hoeppner **(1)** 141
Effect of frequency and orientation on fatigue crack propagation in polyamide-12
R. Boukhili, F. X. de Charentenay and T. Vu-Khan **(8)** 127
Effect of hydrogen charging on the torsional fatigue behaviour of 2024 aluminium
T. S. Sudarshan, T. A. Place, M. R. Louthan Jr and H. H. Marbie **(7)** 155
The effect of load stepdown on fatigue crack arrest and retardation
H. Sehitoglu and D. L. McDiarmid **(2)** 55
Effect of martensite content on the fatigue of dual-phase steel
A. M. Sherman and R. G. Davies **(3)** 36
The effect of mean stress on delay in fatigue crack growth under load stepdown
D. L. McDiarmid, W. Choy and T. M. Lee **(6)** 101
Effect of microstructure on the plain and notched fatigue properties of IMI 550 Ti alloy
T. M. Yue, K. Tabeshfar and P. J. E. Forsyth **(7)** 149
The effect of microstructure on the mechanical behaviour of a low carbon, low alloy steel
M. T. Yu, T. H. Topper and L. Wang **(10)** 249
The effect of narrow-band random loading on the high cycle fatigue strength of edge-cracked mild steel plates
L. P. Pook and A. F. Greenan **(1)** 17
The effect of overloads on threshold and crack closure
T. H. Topper and M. T. Yu **(7)** 159
The effect of prior fatigue on the creep behaviour of type 321 stainless steel
K. U. Snowden, D. S. Hughes and P. A. Stathers **(4)** 217
Effect of prior treatment on the low cycle fatigue behaviour of aluminium alloy RR58 at 423 K
Vakil Singh, M. S. N. Rao and P. Rama Rao **(2)** 12
The effect of vacuum on fatigue crowth
N. M. Grinberg **(4)** 83
The effects of saline aqueous corrosion on fatigue crack growth rates in 316 grade stainless steel
J. D. Bolton and M. L. Redington **(5)** 155
Effects of small defects on fatigue strength of metals
Y. Murakami and T. Endo **(2)** 23
Environmental dynamic fatigue crack propagation in high density polyethylene – an empirical modelling approach
H. A. El-Hakeem and L. E. Culver **(3)** 3
Environmental dynamic fatigue crack propagation in nylon 66
H. A. El-Hakeem and L. E. Culver **(1)** 133
Estimation and correlation of fatigue lives for random loading
N. E. Dowling **(10)** 179
Evaluation of fatigue crack initiation life from a notch

T. Sato and H. Shimada **(10)** 243
Evaluation of mean stress effect on fatigue life by use of damage parameters
M. Nihei, P. Heuler, Ch. Boller and T. Seeger **(8)** 119
Evaluation of small cycle omission criteria for shortening of fatigue service histories
A. Conle and T. H. Topper **(1)** 23
Experimental crack tip displacement analysis under small-scale yielding conditions
G. Nicoletto **(8)** 83
Factors influencing the effective fatigue threshold, $\Delta K_{eff,th}$
Du Bai-ping, Li Nian and Zhou Hui-jiu **(9)** 43
FATSYS, a computer controlled system for fatigue crack growth data collection using an Amsler Vibrophore
J. R. *Griffiths* **(5)** 193
Fatigue analysis of offshore platforms subject to sea wave loadings
G. K. Chaudhury and W. D. Dover **(7)** 13
Fatigue analysis of manufacturing defects in weldments
H. Jakubezak and G. Clinka **(8)** 51
Fatigue and static tests on a modern railway truck frame
A. Fredani **(9)** 17
Fatigue behaviour and mean effects in grey cast iron
J. Fash and D. F. Socie **(4)** 137
Fatigue behaviour of microalloyed steels for hotforged mechanical components
P. Farsetti and A. Blarasin **(10)** 153
Fatigue behaviour of porous polysulphone surface coatings for orthopaedic applications
N B. *Beals*, D. L. *McDowell and M. Spector* **(9)** 211
Fatigue crack growth analysis under sea-wave loading
Y. W. Cheng **(10)** 101
The fatigue crack direction and threshold behaviour of mild steel under mixed Mode I and III loading
L. P. Pook **(7)** 21
Fatigue crack growth from sharp notches
C. S. Shin and R. *A. Smith* **(7)** 87
Fatigue crack growth in tubular welded connections
W. D. Dover and S. J. Holdbrook **(2)** 37
The fatigue crack growth of a ship steel in seawater under spectrum loading
Y. W. Cheng **(7)** 95
Fatigue crack growth rates and fracture toughness in electroslag refined En 52 steel
Mohan G. Hebsur, K. P. Abraham and Y. V. R. K. *Prasad* **(2)** 147
Fatigue crack growth rates in a porous metal
P. S. DasGupta and R. *A. Queeney* **(2)** 113
Fatigue crack growth retardation due to the application of impact overloads
H. Nakayama, K. Tozawa and A. Hirano **(9)** 163
Fatigue crack growth retardation under constant amplitude and variable mean stress
G. Glinka and K. Molski **(2)** 105
Fatigue crack initiation and propagation in several nickel-base superalloys at 650°C
J. Gayda and R. V. Miner **(5)** 135
Fatigue crack propagation behaviour of rotor and wheel materials used in steam turbines
C. Poon, D. Vitale, M. Singh and D. W. Hoeppner **(5)** 87
Fatigue crack propagation behaviour of type 316 stainless steel at elevated temperature in a vacuum
W. J. Mills and L. A. James **(10)** 33
Fatigue crack propagation in glass-fibre and glass-sphere filled PBT composites
H. Voss and J. Karger-Kocsis **(10)** 3
Fatigue crack propagation in tensile residual stress fields of welded joints under fully compressive cycling
A. Ohta, M. Kosuge, T. Mawari and S. Nishijima **(10)** 237
Fatigue-crack propagation in aluminium alloy NP8 determined from tests on 12.5 mm nominal thickness specimens
A. Storey **(1)** 195
Fatigue crack propagation of bainitic nodular cast iron
Ji-Liang Doong and Shy-Ing Yu **(10)** 219
Fatigue crack propagation rates and threshold stress intensity factors for welded joints of HT80 steel at several stress ratios
A. Ohta, E. Sasaki, M. Nibei, M. Kosuge, M. Kanao and M. Inagaki **(4)** 233
Fatigue damage accumulation in grey cast iron
D. J. Weinacht and D. F. Socie **(9)** 79
Fatigue failure of jet engine drive shafts
H. J. Kolkman and J. P. K. Vleghert **(8)** 3
Fatigue fracture mechanics analysis of offshore structures
W. D. Dover **(3)** 52
Fatigue growth of surface cracks in nickel-based superalloys
C. W. Brown and M. A. Hicks **(4)** 73
Fatigue integrity assessment
T. V. Duggan **(3)** 61
Fatigue life and plastic deformation character of copper at low temperatures
L. F. Yakovenko and N. M. Ginberg **(5)** 239
Fatigue life estimation under random loading using the energy criterion
V. Kliman **(7)** 39
Fatigue life prediction of a structural steel under service loading
N. A. Fleck and R. *A. Smith* **(6)** 203
Fatigue life prediction of glass fibre-reinforced plastics using the acousto-ultrasonic technique
V. K. Srivastava and R. *Prakash* **(9)** 175
Fatigue life prediction of offshore tubular joints using a linear elastic fracture mechanics approach
G. S. Bhuyan **(10)** 117
Fatigue life predictions for discrete strain Markov process
D. J. Dowdell, H. H. E. Leipholz and T. H. Topper **(10)** 227
Fatigue of cold worked ribbed reinforcing bar – a fracture mechanics approach
A. S. Saleh el din and J. M. Lovegrove **(4)** 15
Fatigue of land-based structures
G. P. Tilly **(7)** 67
Fatigue of plain concrete in compression under varying sequences of two-level programme loading
E. W. Bennett **(2)** 171
Fatigue of spot-welded lap joints
G. Matsoukas, G. P. Steven and Y. W. Mai **(6)** 55

The fatigue of structural wire strands
R. E. Hobbs and K. Ghavami **(4)** 69
The fatigue properties of some cast steels
K. Selby **(4)** 124
Fatigue properties of specimens similar to components deep rolled under optimized conditions
K. H. Kloos, B. Fuchshauer and J. Adelmann **(9)** 35
Fatigue research at Portsmouth Polytechnic
T. V. Duggan **(2)** 51
Fatigue reliability in welded joints of offshore structures
P. H. Wirsching **(2)** 77
Fatigue strength evaluation of welded joints containing high tensile residual stresses
A. Ohta, Y. Maeda, T. Mawari, S. Nishijima and H. Nakamura **(8)** 147
Fatigue strength in heavy machine construction: assumptions, requirements, objectives
D. Hanewinckel **(1)** 191
Fatigue strength of high strength dual-phase steel sheet
J. O. Sperle **(7)** 79
The fatigue threshold, surface condition and fatigue limit of steel wire
U. Verpoest, E. Aernoudt, A. Deruyttere and M. DeBondt **(7)** 199
Fatigue thresholds: their applicability to engineering situations
D. Taylor **(10)** 67
A field recording system with applications to fatigue analysis
D. Socie, G. Shifflet and H. Berns **(1)** 103
'Flaw Matrix' and its application to some ceramics
N. Kamiya and O. Kamigaito **(5)** 231
Flexural fatigue resistance of ultra-high molecular weight polyethylene at ambient and low temperature
H. Yelle, R. Gaswin and G. Narvaez **(7)** 219
Flight simulation fatigue crack propagation in 7010 and 7075 aluminium alloy plate
R. J. H. Wanhill, W. G. J. 'tHart and L. Schra **(1)** 205
Fracture analysis, service life prediction and strengthening of elevator links for oil well drilling equipment
Jin Da-Zeng, Deng Zeng-Jie and Zhou Hui-Jiu **(5)** 43
Fracture energy analysis via acoustic emission
L. T. Maslov and O. M. Gradov **(8)** 671
Fracture mechanics and testing of steel for large rotors
A. Freddi **(3)** 71
Fracture of fatigue-loaded composite laminates
K. L. Reifsnider and R. Jamison **(4)** 187
Fracture thermoemission model of solids
L. I. Maslov and O. M. Gradov **(8)** 143
A further study on fatigue crack initiation life – mechanical model for fatigue crack initiation
Zheng Xiulin **(8)** 17
Gel electrode imaging of fatigue cracks in aluminium alloys
W. J. Baxter **(5)** 37
Growth of surface fatigue cracks in a steel plate
O. Vosikovsky and A. Rivard **(3)** 111
How surface damage removal affects fatigue life
S. Jeelani and M. A. Scott **(10)** 257
Impact and subsequent fatigue damage growth in carbon fibre laminates
W. J. Cantewell, P. T. Curtis and J. Morton) **(6)** 113
Improvement of fatigue life prediction accuracy for various realistic loading spectra by use of correction factors
A. Buch, T. Seeger and M. Vormwald **(8)** 175
The influence of coldforming on the low cycle fatigue behaviour of the fine-grained structural steel Fe E 47 and the age-hardened aluminium alloy AlCuMg2
C. M. Sonsino **(6)** 173
The influence of cyclic material properties on fatigue life prediction by amplitude transformation
E. Haibach **(1)** 7
The influence of environment and stress ratio on the low frequency fatigue crack growth behaviour of two medium-strength quenched and tempered steels
B. F. Jones **(6)** 75
Influence of environmental and mechanical variables on fatigue crack growth rates in CSA G40.21M 350 WT steel
G. S. Bhuyan, A. S. J. Swamidas and O. Vosikovsky **(10)** 37
Influence of ferrite-martensite microstructural morphology on the low cycle fatigue of a dual-phase steel
S. R. Mediratta, V. Ramaswamy and P. Rama Rao **(7)** 107
Influence of heat treatment on low frequency fatigue crack growth rates for a marine steel tested in air and seawater
B. F. Jones **(3)** 167
The influence of joint dimensions on the fatigue strength of welded tubular joints
J. G. Wylde and A. McDonald **(2)** 31
Influence of martensite carbon content on the cyclic properties of dual-phase steel
A. M. Sherman and R. G. Davies **(3)** 195
Influence of microstructure on the cyclic crack growth in a low-alloy steel
J. Woodtli and J. C. Radon **(6)** 221
The influence of minor cycles on low cycle fatigue crack propagation
B. E. Powell, T. V. Duggan and R. Jeal **(4)** 4
Influence of notch root radius on ductile rupture fracture toughness evaluation with Charpy-V type specimens
R. Roberti, G. Silva, D. Firrao and B. De Benedetti **(3)** 133
Influence of prestraining and ageing on fatigue properties of high-strength sheet steels
K. Fredriksson, A. Melander and M. Hedman **(10)** 139
The interaction between low cycle fatigue and lamellar tearing in AISI 316L welded joints
G. Cai, C. Culla, E. Manfredi and B. Tesi **(10)** 81
Investigation of the strength and cyclic fracture toughness of BT-16 titanium alloy subjected to thermal cycling simulating diffusion welding
A. Z. Pimenova, A. P. Ternovskii and S. V. Ivanov **(3)** 205
J-resistance curve and ductile tearing of a mild steel
P. M. S. T. de Castro, J. C. Radon and L. E. Culver **(1)** 153
A kink in the fatigue crack growth curve
V. M. Radhakrishnan **(6)** 217
Lifetime measurements for random loading in the very

high cycle fatigue range
S. E. Stanzl, E. K. Tschegg and H. Mayer **(8)** 195
Low cycle fatigue behaviour of a 1Cr-Mo-V steel with bainite and ferrite microstructure
S. K. Bhambri, C. R. Prasad and R. Vasudevan **(9)** 239
Low cycle fatigue behaviour of a dual-phase steel with different volume fractions of martensite
S. R. Mediratta, V. Ramaswamy and P. Rama Rao **(7)** 101
Low cycle behaviour of a plasma-sprayed coating material
J. Gayda, T. P. Gabb and R. V. Miner **(8)** 217
Low cycle fatigue behaviour of a titanium 829 alloy
W. J. Plumbridge and M. Stanley **(8)** 209
Low cycle fatigue behaviour of cast nickel-base superalloy IN738LC at room temperature
Gua Jianting and D. Ranucci **(5)** 95
Low cycle fatigue behaviour of titanium alloy 685
C. Ramachandra, V. K. Verma and V. Singh **(10)** 21
Low cycle fatigue life enhancement of 316 L stainless steel by nitrogen alloying
J. B. Vogt, S. Degallaix and J. Foct **(6)** 211
Magneto-fatigue: the fatigue behaviour of two ferromagnetic materials in a magnetic field
M. S. C. Bose and S. L. Kanitkar **(8)** 79
A mathematical equation relating low cycle fatigue data to fatigue crack propagation rates
Y. Y. Liu and F. S. Lin **(6)** 31
Measurement of fatigue crack closure through electron microscopy
R. Sunder and P. K. Dash **(4)** 97
Measuring fatigue cracks in fillet welded joints
I. F. C. Smith and R. A. Smith **(4)** 41
The measurement of fatigue cracks at spot-welds
J. F. Cooper and R. A. Smith **(7)** 137
Mechanisms of damage in high-temperature, low-cycle fatigue of an aluminium alloy
T. S. Srivatsan **(10)** 91
A method for correlating different types of fatigue curve
A. Esin **(2)** 153
A method for determining the heat energy of the fatigue process in metals under uniaxial stress. Part I: Determination of the amount of heat liberated from a fatigue-tested specimen
R. Błotny and J. Kaleta **(8)** 29
A method for determining the heat energy of the fatigue process in metals under uniaxial stress. Part 2: Measurement of the temperature of a fatigue specimen by means of thermovision camera-computer system
R. Błotny, J. Kaleta, W. Grzebień and W. Adamczewski **(8)** 35
A method for improving the performance of fatigue machines in variable amplitude loading tests
A. Lanciotti **(5)** 217
The method of maximum likelihood applied to the statistical analysis of fatigue data
J. E. Spindel and E. Haibach **(1)** 81
A method to assess notched fatigue behaviour
A. Esin and B. Uzuner **(7)** 215
Micromechanisms of fatigue crack growth in aluminium alloys
D. Rhodes, K. J. Nix and J. C. Radon **(6)** 3
Microscopic-damage-based criterion for fatigue failure prediction
W. E. Mayo **(9)** 203
Mixed-mode fatigue crack growth under biaxial loading
R. K. Pandey and A. B. Patel **(6)** 119
Mode III fatigue crack propagation rates in 6061-T6 aluminium
R. P. Wright and R. A. Queeney **(4)** 27
A model for fatigue crack growth in a threshold region
J. C. Radon **(4)** 161
Modelling of the fatigue damage processes of bus frames
P. Michelberger, J. Ginsztler, A. Keresztes and P. Várlaki **(6)** 107
Monitoring mechanical vibrations using a histogram recorder
J. R. Schnittger **(5)** 145
Monotonic and cyclic crack tip plasticity
L. Guerra-Rosa, C. Moura Branco and J. C. Radon **(6)** 17
Mooring line fatigue in an offshore guyed tower
H. B. Kanegaonkar and A. Halder **(10)** 199
Morphometrical evaluation of surface roughness during the initial fatigue stage in an austenitic steel
J. Woodtli-Folprecht **(6)** 157
New approach to determination of fracture toughness under conditions of elastic/plastic behaviour of materials
V. S. Ivanova, L. I. Maslov and A. D. Zotov **(3)** 77
A new definition of the rainflow cycle counting method
I. Rychlik **(9)** 119
Notch fatigue behaviour of SAE1045 steel
M. T. Yu, D. L. DuQuesnay and T. H. Topper **(10)** 109
Note on fatal aircraft accidents involving metal fatigue
G. S. Campbell **(3)** 181
Numerical simulation of fatigue crack growth
D. K. Brown and M. J. Cowling **(5)** 199
On-site indication of fatigue damage under complex loading
H. Anzai and T. Endo **(1)** 49
On a fatigue formula under stress cycling
Zheng Xiulin and Lu Baotong **(9)** 169
On the estimation of the cyclic plastic strain energy of dual-phase steels
S. R. Mediratta, V. Ramaswamy and P. Rama Rao **(10)** 13
On the failure condition in strain-controlled low cycle fatigue
K. Bhanu Sankara Rao, M. Valsan, R. Sandhya, S. K. Ray, S. L. Mannan and P. Rodriguez **(7)** 141
On the relationship between fatigue limit, threshold and microstructure of a low-carbon Cr-Ni steel
Li Nian, Du Bai-ping and Zhou Hui-jiu **(6)** 689
On the influence of rubbing fracture surfaces on fatigue crack propagation in Mode III
E. K. Tschegg, R. O. Ritchie

and F. A. McClintock **(5)** 29
Overstrain effects during variable amplitude service history testing
A. Conle and T. H. Topper **(2)** 130
Parameters and micromechanisms of fatigue crack growth in sheet magnesium alloy samples
N. M. Grinberg and V. A. Serdyuk **(3)** 143
The plastic zone and growth of fatigue cracks in magnesium MA12 alloy at room and low temperatures
V. A. Serdyuk and N. M. Grinberg **(5)** 79
A practical mixed Mode II/III fatigue test rig
A. K. Hellier, D. J. H. Corderoy and M. B. McGirr **(9)** 95
Predicting the onset of high cycle fatigue damage: an engineering application for long crack fatigue threshold data
B. E. Powell and T. V. Duggan **(8)** 187
Prediction of constant amplitude fatigue lives of precracked specimens from accelerated fatigue data
P. K. Poulose and D. L. Jones **(5)** 99
The prediction of fatigue life under random loading: a diffusion model
K. P. Oh **(2)** 99
Prediction of threshold and ultra-low fatigue crack growth rates
L. Guerra-Rosa, C. M. Branco and J. C. Radon **(7)** 183
Probability of fatigue failure as a statistic
A. Tsurui **(3)** 125
A proposed stress history for fatigue testing applicable to offshore structures
W. H. Hartt and N. K. Lin **(8)** 91
Rainflow counting algorithm for very long stress histories
G. Glinka and J. C. P. Kam **(9)** 223
Rate sensitivity of mechanical properties and fracture characteristics of two-phase titanium alloys subjected to thermal cycles of diffusion welding
A. Z. Pimenova **(3)** 199
A realistic computer-based fatigue comparison of spheroidal graphite cast iron and cast steel
P. Watson and B. J. Dabell **(1)** 69
Relationship between fatigue crack behaviour and microstructure in 7178 aluminium alloy
P. J. E. Forsyth and A. W. Bowen **(3)** 17
The relationship between fatigue fracture parameters during selfsimilar fatigue crack growth
V. S. Ivanova, L. I. Maslov, S. A. Kunavin and M. Arita **(5)** 165
Relevance of the small crack problem to lifetime prediction in gas turbines
J. Lankford and S. J. Hudak, Jr **(9)** 87
Repeatability of gel electrode measurements of fatigue deformation in 6061-T6 aluminium
W. J. Baxter **(6)** 243
Repeated plastic deformation as a common cause of mechanical damage in fatigue, wear, fretting fatigue and rolling fatigue: a review
W. Barrois **(1)** 167
Residual stress effects during near-threshold fatigue crack growth
W. Geary and J. E. King **(9)** 11
A review of aero-generator fatigue problems
A. J. Pretlove and P. J. Worthington **(5)** 15
S–N curve *vs* fracture mechanics approach to fatigue analysis of steel jacket platforms
R. P. Singh and A. Gupta **(10)** 49
Scanning electron microscopy studies on flexing and tension fatigue failure of rubber
N. M. Matthew and S. K. De **(5)** 23
A servohydraulic-controlled load frame for SEM fatigue studies
D. W. Cameron and D. W. Hoeppner **(5)** 225
Short fatigue crack growth behaviour: data analysis effects
J. M. Kendall and J. E. King **(10)** 163

Conference Reports

Advances in life prediction methods *(Albany, NY, USA, 18–20 April 1983)* (5) 248
Biennial symposium of the International Committee on Aeronautical Fatigue *(Toulouse, France, 25–27 May 1984)* (6) 62
Digital techniques in fatigue *(City University, London, UK, 28–30 March 1983)* (5) 250
6th European Conference on Fracture (ECF6) (Amsterstam, The Netherlands, 15–20 June 1986) (9) 125
Fatigue 84 *(Birmingham, UK 3–7 September 1984)* (7) 59
Fatigue and creep of composite materials *(Risø, Denmark, 6–10 September 1982)* (5) 49
Fatigue at High Temperature *(Paris, France, 9–11 June 1986)* (9) 59
Fatigue behaviour of metallic materials *(Bad Nauheim, FRG, 8–9 November 1984)* (7) 123
Fatigue in offshore steel structures *(University College, London, UK, 30 September–2 October 1981)* (4) 50
Fatigue of Engineering Materials and Structures (Sheffield, UK, 15–19 Septmeber 1986) (9) 251
Fatigue of Welded Constructions *(Brighton, UK, 7–9 April 1987)* (9) 187
Fatigue prevention and design *(Amsterdam, The Netherlands, 21–23 April 1986)* (8) 240
Fatigue '87. The 3rd International conference on fatigue and fatigue thresholds *(Charlottesville, VA, USA, 29 June–3 July 1987)* (10) 57
First international conference on fatigue and corrosion fatigue up to ultrasonic frequencies *(Seven Springs Mountain Resort, Champion, PA, USA, 25–30 October 1981)* (4) 238
Fracture mechanisms and mechanics - the second European colloquium on fracture (ECF 2) *(Darmstadt, Federal Republic of Germany, 9–11 October 1978)* (1) 58
ICAF '87. 20th Conference and 14th symposium of the International Committee on Aeronautical Fatigue *(Ottawa, Canada, 8–9 June 1987)* (10) 132
International conference on composite materials (ICCM VI) *(London, UK, 20–25 July 1987)* (10) 131
International conference on fracture mechanics in engineering applications *(Bangalore, India, 26–30 March 1979)* (1) 159
1st International conference on residual stresses (Garmisch-Partenkirchen, FRG, 15–17 October 1986) (10) 59
2nd International conference on low cycle fatigue and elastoplastic behaviour of materials *(Munich, FRG, 7–11 September 1987)* (10) 268
Micromechanisms of crack extension *(Cambridge, UK, 31 March–2 April 1980)* (2) 185
Second international conference on biaxial/multiaxial fatigue *(Sheffield, UK, 16–20 December 1985)* (8) 103
Sixth international conference on fractue-ICF6 *(New Delhi, India, 4–10 December 1984)* (7) 169
Steel in marine structures *(Paris, France, 5–8 October 1981)* (4) 110
Steel in Marine Structures (Delft, The Netherlands, 15–18 June 1987) (9) 251
Structural fatigue testing and analysis *(NEL, East Kilbride, Scotland, 16–17 March 1982)* (4) 172
Symposium on the behaviour of short fatigue cracks *(Sheffield, UK, 25–28 September 1985)* (8) 45
Techniques for high temperature fatigue testing *(Preston, UK, 13–14 September 1983)* (6) 131
